PROFESSIONAL SUMMARY

Full-Stack Software Developer with a strong focus on frontend development, complemented by expertise in backend systems and UI/UX design. Proficient in modern JavaScript frameworks like React and Next.js, while also skilled in server-side technologies such as Node.js, Express, Python and PostgreSQL. Proven ability to manage end-to-end development, from prototyping to deployment, with a keen eye for performance optimization and scalable architectures.

CORE SKILLS

- Frontend: React.js, Next.js, JavaScript, TypeScript, Redux, Micro-frontend, SSG, TTD, SEO, Websockets, PWAs, Tailwind, Bootstrap, Webflow, Wordpress, Joomla etc.
- Backend: Node.js, Python, Django, Flask, Express, RESTful APIs, SQLAlchemy, PostgreSQL, MySQL, MongoDB, Redis etc.
- Version Control & DevOps: Git, Containerisation, Docker, CI/CD Pipeline, Bash etc.
- Design & Tools: Figma, CorelDraw, Adobe XD, Photoshop, Trello
- Other: Webpack, Jest, Swagger, Agile Methodologies, Performance & Accessibility, TTD.

PROFESSIONAL EXPERIENCE

Senior System Analyst/Web Developer/Trainer 2017-Date
University of Calabar Calabar, NG

- Web Development: Proposed solutions to address identified teaching challenges.
- Gap Analysis: Conducted gap analysis to identify disparities between current and desired system.
- Training and Education: Conducted several one-on-one training for both staff and students

Senior Frontend Developer 2023-Date
Int+ Technology Ltd Remote

- Developed responsive user interfaces for an e-commerce PWA using frameworks Next.js.
- API Integration: Implemented third-party APIs to boost the app' s capabilities and facilitate smooth interactions with external services.

Software Developer 2022-Date
Freelancer Remote, NG

- Frontend Development: Crafted dynamic, responsive user interfaces with modern frameworks like React and Next.js, ensuring seamless user experiences.
- API Integration: Integrated third-party APIs to enhance website functionality and enable seamless interactions with external service
- Server-Side Technologies: Developed robust server-side solutions using frameworks such as Node.js, Django

Web Developer 2024-2024
HNG Nigeria, Remote, NG

- Collaborated with cross-functional teams to build and refine user-centric features using modern web technologies, demonstrating the ability to meet tight deadlines in a fast-paced, remote environment.

Lead Graphics Designer 2016-2017
Sarki Digital Impressions Ltd Abuja, NG

- Data-Informed Design: Utilized data and insights to inform design decisions and the impact of design changes. Contributed to the design of brand identity, ensuring a consistent and cohesive brand experience.

- Successfully designed Annual reports for a number of high profile organizations like Kano Electricity Distribution Company, Office of the Accountant General of the federation (OAGF).

Technical Support

2014-2016

Academic Automation Technology Ltd & JKC Consulting Ltd

Abuja, NG

- Hardware/Software Installation and Configuration: Guided users through the installation and configuration of hardware and software applications, ensuring compatibility and functionality.
- User Training: Conducted user training sessions to empower users with the knowledge to troubleshoot common issues independently and more.

CDS, Team Lead (Volunteer Experience)

2012-2013

Community Development Service Group for Sustainable Development Goals (SDGs),

Ondo, NG

- Led initiatives focused on promoting sustainable development, coordinating activities to enhance community awareness and engagement.

EDUCATION AND TRAINING

BSc in Computer Science

2007-2011

University of Abuja,

Abuja, NG

- Coursework in Data Communications, Data Structure, Programming, Internet, AI, OS, Multicloud etc.
- Object-Oriented Programming (OOP): Applied OOP principles to design and implement scalable software solutions.

Certificate in Software Engineering

2023-2024

ALX Africa/Holberton,

Lagos, NG

- Industry-Relevant Curriculum: The curriculum is robust and designed to be relevant to industry needs.
- Project-Based Learning: Involves hands-on programming with Javascript, C, Python, Shell etc.

ONGOING PROJECTS

Laundbot – A Fully Customizable Service Delivery App (Ongoing) - Next.js, Node.js, PostgreSQL, TypeScript

<https://github.com/Emeriego/laundbot-api>, <https://github.com/Emeriego/laundbot-client>

- Fullstack application for service-oriented businesses (e.g., laundry shops) to manage operations, clients, and orders. It is live and can be viewed on
- Built an admin interface with CRUD functionality for tracking services, customers, and shop activities.
- Upcoming: Customer-facing interface for direct bookings, transforming the app into a marketplace for multiple service businesses.

DriveBy – Peer-to-Peer Car Rental System (Ongoing) - React.js, Django, PostgreSQL, Javascript

<https://github.com/Emeriego/driveby>, <https://github.com/Emeriego/driveby-client>

- Fullstack platform where car owners can list their vehicles for rent, enabling vetted customers to make rental requests.
- Developed key features such as request acceptance based on user ratings, and workflow management for confirming, canceling, or completing rentals.
- Integrated car rating system for insights, and email notifications for real-time updates.
- To roll out a map feature for easier location-based rentals.

Storefront – Pan-African E-commerce Marketplace By Int+ Technology (Ongoing) - Next.js, Node.js, PostgreSQL, TypeScript

- Developing a robust e-commerce platform designed to enable vendors across social media to seamlessly redirect potential clients to finalize transactions and process payments.
- Integrated vendor management and payment gateway solutions for secure, efficient transactions.
- Focused on building a scalable infrastructure to support a large user base across multiple countries.
